

AMSTI MATH

By John Higginbotham

Are we showing our students the best ways?

Mainstream classical math practices are falling behind.

Standards should be explored thoroughly, rather than focusing on quick ways to find answers.

Tactile teaching tools throughout.

I can change instructional practice because it is in my students' best interest!

Math requires number sense, which isn't a formulaic algorithm.

Am I using language that creates understanding, or confusion?

Thinking versus answering

Higher understanding creates smarter mathematicians!
